

Erasmus+

ERASMUS+ POLICY STATEMENT (OVERALL STRATEGY)

This overall strategy was accepted by the Board of Bartın University in 2013 and is annually revised.

As a higher educational institution, Bartın University is of an objective to increase the number of inter-institutional agreements with more universities from various countries, to receive and send more students especially from/to the countries in the European Union. It also aims at sending and receiving qualified teaching staff in order to contribute to the qualification of both staff and students. Our priority is to mobilize especially first and second cycle students and we are eager to sign mutual agreements for double or joint degrees with other universities.

Our vision is to become a university which is respectful for global moral values, to integrate contemporary and innovative teaching methods into our curriculum, to improve the socio-cultural life in the environment and to become a respectful university in national and international standings. In this regard, Bartın University is ready to take any actions that will lead us to becoming a member of leading research and educational institution in scientific world.

Our partners are mainly from Western and Middle-Eastern European countries. We choose our partners by cooperating with our departmental coordinators who sign the inter-institutional agreements after they have decided whether the related department and their course contents are suitable or not with the ones we teach at our institution.

Our strategy as an institution is to increase the agreements and mobilization of both students and academic/administrative staff. Our ultimate goal is to introduce the inbound students and staff our province, Bartın, and its natural, cultural and historical importance and beauties.

Our participation in the Programme will allow us to benefit from the mobility of cultures, language and experience exchanges.

2015 Revised Version
